

Byron Erosion Control Requirements

City Council Approved 6/9/2020

EFFECTIVE IMMEDIATELY

Due to ongoing issues regarding the City's and States policy on erosion control, the following must be completed PRIOR to issuance of a building permit.

- The contractor is required to have a silt fence (or other approved erosion control measure) installed and inspected before a building permit being issued.
 - Call Tom Ricke at 507-775-3413 to schedule an inspection.
- No excavation or building inspections will be scheduled until a Byron Public Works team member has approved the erosion control.

Additional Notes:

- The silt fence must be maintained until permanent ground cover is established.

NOTICE

- Materials tracted into streets shall be cleaned up prior to the close of each workday by means of dry sweeping (e.g. with a broom and/or shovel). Materials shall not be washed down the road into the storm system or water bodies.
- The following will result in an enforcement action by the City:
 - Visible or measurable erosion resulting in off-site sediment transport.
- Protective devices located at catch basins shall be maintained throughout the duration of the project.
- Failure to meet erosion control measures will result in a cease and desist of the project until brought into compliance.

I authorize representatives of the city of Byron to enter upon the property for which I have applied for a permit, for the purpose of making inspections.
